

Fire Alarm System Log Book

The Chequered Flag
32 Borough Street
Castle Donington
Derby, DE74 2LA

Responsible Persons on Site: Mr. ROBERT
ANTHONY SANDHAM

J P Carty (Electrical Contractors) Limited
34 Borough Street
Castle Donington
Derby
DE74 2LA
Telephone: 01332 810773

This log book must be maintained by the responsible person(s) on site and must be available at all times together with the system operating keys.

Every "event" affecting the installation should be recorded, such as fire alarms, failures, tests, temporary disconnections, dates of installing engineers visits, and a note of any outstanding work or conditions.

Shop risk assessment

Shop name: The chequered flag

Date of assessment: 12/08/2019

What are the hazards?	Who might be harmed and how?	What are you already doing?	Do you need to do anything else to manage this risk?	Action by who?	Action by when?	Done
Slips and trips	Staff and customers may be injured if they trip over objects. In addition, they may be injured if they slip on spillages.	- Staff mop up or report spillages. - Good housekeeping				
Handling and moving stock	Staff risk injuries or back pain from handling heavy/bulky objects, eg deliveries of stock.	- Appropriate equipment is available to transport heavy items when moving stock and staff are trained in how to use it safely. - Heavy goods are stored at a Managua or height				
Working at height	Falls from any height can cause bruising and fractures.	- Staff are shown how to use a stable ladder/ other suitable device safely eg not to overreach, not to work on uneven floors. - Only applicable re light bulbs and picture displays				
Health of workers in the shop environment	All staff could be affected by factors such as: - working conditions, eg hot/cold working temperatures, lack of welfare facilities or cramped conditions; or - lack of job control, eg no control over timing of breaks, high volumes of customers during busy periods.	- Staff can speak confidentially to a supervisor or manager if they are feeling unwell or ill at ease because of work. - Staff work maximum 4 hour shifts with a drinks break to be taken during slow trading				
Threat of robbery and violence	Staff may suffer stress and/or injury from assaults, threats and abuse from members of the public.	- Staff report and take appropriate action on any incidents of abuse etc to manager for support/discussion. - Access points are double locked and an alarm system is fitted Security cameras to be fitted first week of september				
Fire	If trapped, staff and customers could suffer fatal injuries from smoke inhalation/burns.	I have considered this and it doesn't apply to my shop.				

Shop risk assessment

What are the hazards?	Who might be harmed and how?	What are you already doing?	Do you need to do anything else to manage this risk?	Action by who?	Action by when?	Done
Shop equipment	Staff/customers could get electrical shocks or burns from using faulty electrical equipment, including portable electrical equipment – heaters, fans etc. Electrical faults can also lead to fires. Staff may also suffer injury from moving parts of equipment or unbalanced equipment.	- All new equipment is checked before the first use to ensure that there are no obvious accessible dangerous moving parts, or the siting of the equipment does not cause additional hazards. - Staff are encouraged to spot and report any defective plugs, discoloured sockets, damaged cable and on/off switches.				
Cleaning	Staff risk skin irritation or eye damage from direct contact with cleaning chemicals. Vapour from cleaning chemicals may cause breathing problems.	- Mops, brushes and protective gloves are provided and used. - Staff are shown how to use cleaning products safely. - Cleaning materials are properly stored.				
Young persons, disabled or pregnant workers	Some workers may be at a greater risk of harm from low risk hazards eg: - young workers (under 18 years of age); - disabled workers; and - pregnant workers and nursing mothers.	- All staff to be aware that young colleagues may be inexperienced or lack awareness of risks. - Procedures are in place to protect young people, who might be more susceptible to certain risks, eg lack of maturity to deal with aggressive customers. - Manager agrees action plan to address any specific needs.				

It is important you discuss your assessment and proposed actions with staff or their representatives.

You should review your risk assessment if you think it might no longer be valid (eg following an accident in the workplace) or if there are any significant changes to the hazards in your shop, such as new work equipment or work activities.
