# Marlborough Square redesign

Marlborough Square is getting a revamp to make it a more attractive public space that is pleasant for pedestrians and can be used for events.

North West Leicestershire District Council has pledged £1.1 million for this redesign.

When will this work be done?  
Once the final designs are drawn up, the work will take around six months. We hope it will be completed during winter 2018/19.

# Marlborough Square redesign

## Events

We hope to bring at least one event to the new square each month.

Special markets, funfairs and exhibitions

What sort of events would you like to see in the new square?

# Marlborough Square redesign

## Parking

Approximately five free short stay parking spaces will be provided in the new square (30 minutes).

Three of these spaces will be used by the church for funerals and weddings.

The 24 current spaces will be moved to James Street Car Park (12 free one hour spaces) and Margaret Street Car Park (12 free one hour spaces).

# Marlborough Square redesign

## Traffic, buses and taxis

Vehicles will only be able to travel through the square one way – from Jackson Street to Belvoir Road.

The roads around the square will be raised to encourage lower speeds and a 20mph speed limit will be enforced.

There will be two bus bays with shelters and one waiting space for buses.

The taxi rank will be opposite the day nursery. It will hold approximately three cars. At night, when there are no buses running, the bus bays will be used as an additional taxi rank.
